Key Industries Served

Construction: With a solid understanding of construction industry operations, we understand your business and we use our own service tools to power your day-to-day success.

Manufacturing: From raw materials to finished goods, your day-to-day activities require accounting professionals who work with machine-like precision.

Logistics & Distribution: When your people and freight move across borders and through different tax and regulatory zones, we will help manage the change.

Experienced & Responsive

We are Matt Wilson and Maya Ivanova, two CPAs who started Wilson Ivanova in 2014. Since then, we've built a firm of more than a dozen accounting professionals. But our original goal remains the same – to help grow local businesses by providing high-quality services with high ethical standards. We developed our skills at large CPA practices, and we enhanced those with a responsive and personal style that we believe works best for fast-moving businesses like yours!

Efficiency & Quality

Every business today must focus on delivering products and services with efficiency and quality. We do that by staying highly informed and educated about the dynamic industries in which our clients work.

Our Service Strengths

We deliver the services you need when you need them. Our expertise is in advisory and assurance services, from compilation to audit. We provide a service range from bookkeeping to cash- management to part-time CFO arrangements. And for businesses considering succession, we create plans for the most positive long- term impact.

High Standards

All Wilson Ivanova accountants work like part of your team. This commitment keeps us focused on two things: helping you reach your goals, and upholding the highest ethical and professional standards.

“We'll provide high-quality accounting and financial services so you make the right business decisions with confidence.”
